FUSION

Document Management, Workflow, and Collaboration Platform

When it's time to get your information-handling processes working together with ease, consider simplicity. Consider Fusion.

s i m p l i c i t y . Document Management, Workflow, and Collaboration Platform

The biopharmaceutical industry has always been challenged by mountains of documents. A multiplicity of projects, collaborations, document lifecycles... a vast array of regulatory requirements, each with deadlines, approval paths, and mandated training schedules. And to control it, a jumble of unrelated applications to learn, sign into, switch between.

What's the very human result? The quiet use of unwieldy, insecure, and untrackable work-arounds: e-mail, handwritten notes, phone calls. Biopharmaceuticals know this well.

Tourtellotte Solutions' Fusion changes all that. Fusion is the first platform designed specifically to integrate the document management systems, information, and processes unique to the biopharmaceutical industry. Versioning, collaborative review and approval, secure storage, work paths, training, and more are in one clean, simple interface. Easy to get at, easy to learn, easy to use.

Fusion boosts everyday productivity and simplifies compliance – just by providing absolute ease of use. There are fewer things to remember, fewer things to forget. And fewer reasons to avoid using the system altogether.

When it's time to get your information-handling processes working together with ease, consider simplicity – consider Fusion.

Fusion simplifies document-management, workflow, and collaboration.

- Integration with EMC Documentum®, EMC eRoom®, PleaseTech Please-Review™, QUMAS Compliance Suite™, and more.
- Available customization and integration with a variety of third-party systems.
- Usability with a number of platforms and browsers, including Microsoft, Mac, and Linux.
- Exclusive in-browser security.
- Simple, native storage for documents.
- Next generation Adobe Flex™ 2 platform.

Fusion has what you need.

- Clean, essentials-only dashboard connects and clarifies the entire document lifecycle: authoring, reviewing, approving, and secure storage.
- Simple, intuitive, aesthetically-satisfying interface invites consistent use.
- At-a-glance tracking simplifies compliance, minimizes redundancy and inadvertent oversights.
- Single sign-on capability for all tasks and workflows enhances ease-of-use, reduces use of work-arounds.
